

Background

As an international retail investment company, Baugur Group had a vision to create an office environment that provides a dramatic fashion based statement within an eclectic idiom.

How we delivered

Having individually sourced specialist artwork, sculptures and furniture from around the globe, we created a bespoke joinery based environment, using black to incite mystery and depth with vibrant colours set against an icy-white backdrop.

The end result is a totally one-off environment which embodies the sense of home and moves the mind away from the workspace.
