

### Background

TNS, the sixth sense of business, leading the world in market information and business insight, craved a workspace that mirrored their talent and celebrated the brand in order to captivate new contributors and attract world class clients.

### How we delivered

The fast track on site construction allowed us to complete 18,000 sq ft in 10 weeks with a 2 week lead in time from appointment to site commencement.

Utilising materials and components, which were fabricated off site, enhanced the quality of the finished workspace, which is predominantly open, warm and friendly with vibrant accent colours over a simplistic white background.
